Position: Junior Level Web Developer

Job Description

Our enthusiastic and driven professionals work together to present a very high level of customer service to our customers. Our customer service is supported by a strong technology team that builds customized tools and resources needed to bring this premier service to perishable shippers. We are seeking an entry level Web Developer to support our current systems. For additional details see below regarding role responsibilities and required skills/experience.

Primary Responsibilities

- Posting new information and updating existing web content using a Web Content Management system. Drupal CMS experience preferred.
- Responsible for assisting in the creation and support of IT Solutions.
- Working directly on application / technical problem identification and resolution.
- Participating in integrated testing and user acceptance of application or infrastructure components.
- Designing and implementing processes, or process improvements, to aid in development and support.
- Maintaining current production database system (MYSQL).

Desired Skills and Experience

- Significant knowledge and experience with HTML, PHP, JavaScript, & JQuery and Photoshop.
- Good communication skills.
- Computer-related or Engineering-related four year College or University Degree (or equivalent).

Benefits:

- Comprehensive Medical & Dental Programs entirely paid for by PeriShip
- Education Reimbursement Program
- 401(k) Program with strong employer match

All interested applications should send a cover letter and current resume to HR@periship.com. Thank you for your interest!
